WELCOME

Welcome to the 2024 NeuroNet Pro Annual Summit!

We are excited to invite your organization to collaborate with a diverse group of healthcare professionals. Our annual meetings have become recognized by participants as refreshingly inclusive of all stakeholders, from healthcare professionals to industry experts, payers, information systems specialists, and others with diverse and relevant insights into improving the neurology delivery model.

We believe that the private practice community sector inherently offers value through superior patient access and cost effective care. Working together yields collective buying power, influence, best practice sharing, and opportunities to share resources needed to compete in an increasingly sophisticated world.

We appreciate your continued support and commitment to improving and protecting the outpatient sector. We hope you can join us in Dallas!

Sincerely,

Christine Mann, MBA

David Evans, MBA

Joseph Fritz, PhD

ABOUT US

NeuroNet is a network of neurology groups dedicated to the long-term viability of the community sector. We are structured into two entities: NeuroNet GPO and NeuroNet Pro.

NeuroNet GPO leverages the collective buying power of our network to assure access to favorable pricing and business support tools. We have grown to 70 group practices representing over 1,000 providers and collective pharmaceutical sales in excess of \$500M.

NeuroNet Pro aims to improve performance by facilitating the sharing of best practices, vetting industry solutions, and connecting various stakeholders to foster collaborations. Our core membership begins with those who buy and sell through the GPO, but we are open to all organizations and individuals that advocate for the inherent value of the private practice model for neurologic care.
