WELCOME

Dear Sponsors and Industry Partners,

Welcome to the NeuroNet Pro 2026 Summit, February 19–20 in Austin, Texas.

Independent neurology practices are the cornerstone of care for nearly 100 million Americans with neurological conditions. Their ability to effectively manage these patients is not just crucial for well-being but also for the economic health of our entire healthcare system. By reducing hospitalizations, preventing complications, and ensuring access to specialized care, these physician-led groups deliver immense value.

This is where your partnership is so vital. You bring the expertise and innovation that can help practices solve their most pressing challenges—from managing staff and reimbursement pressures to adopting new tools for imaging, infusion, and digital health. By engaging directly with our community, you can develop products and services that truly resonate, creating practical, scalable, and high-impact solutions.

At NeuroNet Pro, we have built a trusted peer-to-peer network of private practice neurology leaders. By partnering with us, you gain:

- Direct insight into the needs and priorities that are shaping the future of neurology care.
- A co-creation platform to build high-leverage solutions with the people who deliver care every day.
- Market credibility through alignment with physician-led groups who provide the highest economic and access value in neurology.
- Clear pathways to adoption that can scale across regions and patient populations.

Thank you for joining us at this pivotal moment. Together, we can ensure independent neurology remains strong, innovative, and sustainable for patients, practices, and partners alike.

With appreciation,

David Evans • Christine Mann • Joe Fritz
Partners, NeuroNet Pro

ABOUT NEURONET

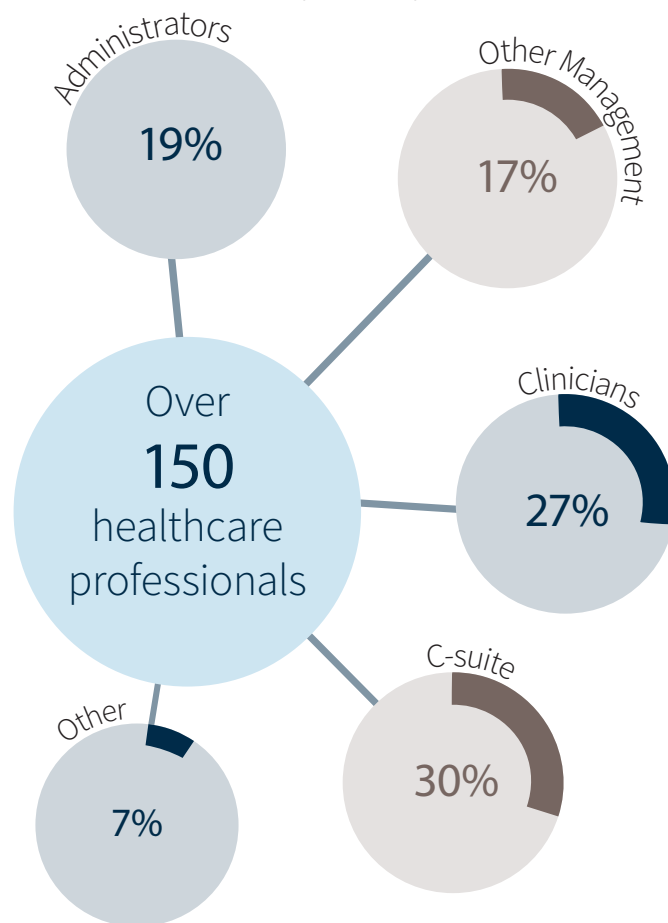

NeuroNet is a network of neurology groups dedicated to the long-term viability of the community sector. We are structured into two entities: **NeuroNet GPO** and **NeuroNet Pro**.

NeuroNet GPO leverages the collective buying power of our network to assure access to favorable pricing and business support tools. We have grown to over 100 group practices representing over 1,000 providers and collective sales over \$1 billion.

NeuroNet Pro aims to improve performance by facilitating the sharing of best practices, vetting industry solutions, and connecting various stakeholders to foster collaborations. Our core membership begins with those who buy and sell through the GPO, but we are open to all organizations and individuals who advocate for the inherent value of the private practice model for neurologic care.

PREVIOUS SUMMIT REVIEW

The **NeuroNet Pro** Annual Summit in 2025 welcomed over 150 healthcare professionals and 43 sponsors at the Grand Hyatt Hotel in Nashville, TN. Year over year we connect a larger audience of healthcare professionals to technologies, medications, operational strategies and more to keep outpatient neurology practices strong.
